WORK EXPERIENCE

T-Systems RUS, St. Petersburg

Oct 2014 — Present

Senior Software Engineer

CenTr@ (Jun 2016—Present)

An internal API-only service that gathers data on T-Systems RUS employees from different sources (SAP, corporate Active Directory, T-Systems Navi, etc.), processes and clears it out, and then provides flexible means for client systems to retrieve necessary data on demand.

Responsibilities:

- Designing the architecture and the overall workflow
- Adding new features and improving the flexibility of the API

Stack:

- Ruby 2.5, Crystal 0.26, Python 3, bash; API-only Ruby on Rails 5.1; MySQL; LDAP; Vagrant, Capistrano

T-Systems Navi (Oct 2014—Present)

An internal navigation and administrative system.

Responsibilities:

- Designing and developing the application
- Introducing new administrative workflows
- Maintaining the application

Stack:

- Ruby 2.1, Ruby on Rails 3.2; CoffeeScript, Bootstrap; MySQL

Wirknetzabbildung (Dec 2016—Present)

An inventory system for operational data on GSM, GPRS, UMTS, and LTE networks of T-Mobile Germany and relevant data of network components.

Responsibilities:

- Developing a replacement for the resource and service management system (mostly PL/SQL part)
- Building and maintaining a fully automated CD workflow (Gitea, Jira, Upsource, Drone)
- Fulfilled assignments regarding PL/SQL scripts and performed database optimizations

Stack:

- Oracle 12c, PL/SQL; Java 8, Spring Boot 2, Tomcat, Redis; Angular 6; Gradle, Liquibase; Watir (Selenium)

Rubicon (Apr—Sep 2015, Jul—Oct 2016, Aug 2017—Present)

A web GIS system for displaying Telekom-related warehouses, shops, and objects within Germany.

Responsibilities:

- Migrating the old proprietary ArcGIS API to the new open one
- Previously, introduced the accessibility capability and improved the ergonomics of the web GUI

Stack:

- JavaScript; ExtJS, GeoExt, OpenLayers; Ant

KIO-Lokalitätsserver (Oct 2015—Feb 2016)

A system that stores information on Telekom's business object addresses and locations in order to enable client systems to unambiguously identify and verify business objects as well as correctly assign resources within all processes.

Responsibilities:

- Built the auto-generation of reports including complex GIS related calculations
- Introduced new features to the existing workflow

Stack:

- PL/SQL; Solaris, ksh; Perl

ExTr@ (Jan 2016—Nov 2017)

An internal system that enables managerial personnel to track overtime and (extra-)events of T-Systems RUS employees and then build reports for employment forecasts.

Responsibilities:

- Designed and developed the application
- Leded the team of four junior members

Stack:

- Ruby 2.4, Ruby on Rails 5; CoffeeScript, Handsontable; Oracle 12c, PL/SQL; Vagrant, Capistrano

**Peter the Great St.Petersburg
Polytechnic University**

Nov 2016 — Jan 2017

Teacher

- Providing a course on web development with Ruby on Rails

Philological Research Institute

Apr 2015 — Nov 2015

Assistant Researcher

- Pursuing the research for the “Quantitative linguistic parameters for definition of stylistic features and domains of text” grant

T-Systems RUS, St. Petersburg

Feb 2014 — Sep 2014

Software Engineer

- Developing the internal navigation system (Ruby on Rails, MySQL, CoffeeScript)

Odnoklassniki, St. Petersburg

Jan 2014 — May 2014

Contracted Technical Writer

- Transcribing the Developer's Guide videos
- Laying out documentation (Adobe FrameMaker)

Systematica, St. Petersburg

Sep 2013 — Feb 2014

Technical Writer

- Developing product documentation (Adobe FrameMaker)
- Translating documents, presentations, and booklets (English)
- Localizing the end-user web application

Nexenta Systems, St. Petersburg

Oct 2011 — Feb 2013

Translator & In-Country Editor

- Technical writing (Adobe FrameMaker)
- Laying out documentation (Adobe FrameMaker, Adobe RoboHelp)
- Performing technical translations (Russian, Japanese, and German)
- l10n and i18n

SKILLS

Technologies:

-
- Ruby (2.0—2.5), Ruby on Rails (3.2—5.1), Sinatra
- Crystal, Python 3, Go, a bit of Elixir
- Oracle 12c, PL/SQL, MySQL
- Shell scripting
- Capistrano, Fabric
- Linux (Oracle Linux / CentOS, Ubuntu)
- Git, SVN
- CoffeeScript, JavaScript, a bit of Angular 6 and ReactJS
- HTML5/CSS3, Sass/Stylus, Bootstrap

Applications:

- RubyMine, DataGrip, WebStorm
- SDL Trados, Adobe FrameMaker, RoboHelp
- Vagrant, Virtual Box

Foreign languages proficiency:

- Russian (native)
- English (fluent)
- German (intermediate)
- Hungarian (pre-intermediate)
- Japanese (pre-intermediate)

EDUCATION

Knowledge Engineering

Sep 2013 — Jun 2015

St. Petersburg State University

MSc in Applied Informatics.

Department of Information Systems in the Arts and Humanities.

Computer Engineering

Sep 2009 — Jun 2013

ITMO University, St. Petersburg

BSc in Computer Science and Engineering.

Department of Computer Technology and Information Systems.

English language

Sep 1999 — May 2009

English Language School

Secondary school with advanced study of English language.

CERTIFICATES

- 日本語能力試験4N (international Japanese exam, 2010)
- KER Ekzameno (international Esperanto exam, 2012)

PUBLICATIONS

- Rosca, S., Patin, D. “WebStorm Essentials“. Birmingham: Packt Publishing, 2015. ISBN 9781785286957. Website: <http://tinyurl.com/webstorm-essentials>
